Conclusion

Observing children file covered various topics regarding classes & activities. These activities are needed to be hold by me & to do so i did research on internet. It helped me alot to learn about the various topic & even got real class exposure because of this file. As i participated & organised activities & file i learned a lot.

CONCLUSION

Regular and systematic observation allow us to reflect all aspects of our job as early childhood educators.

Observing children on regular basis helps teachers in observing or assessing children's development, improve their teaching practices and plan curriculum which would result in overall development of children.

With each interaction and experience, we can see how children process information and how they socialize with their peers. We can learn so much about a child if we take the time to watch, listen and record on daily basis.

Teachers are sometimes influenced by their own ideas of how children should behave.

REPORT

I observed the students of Malya Public School. At first day the principle of that school gives me time table of that day. Then she introduced me with the teachers. Then I went to my respective classes which was given to me to observe. I went to 3rd class first. In that class their subject teacher were taking surprise test from the students. Then I observe their teacher were helping those students who were absent during the time when mam was explaining the unit. She didn't say anything and calmly helping students to understand after that the bell rings their period get over. Everyone stood up and to thank their teacher and start their success prayer by joining hands. I like how students were giving thanks to God for giving them good.

R E P O R T

I observed students of Mahiyya Public School, New Delhi. from 15th - 24th Dec '22. I observed children from classes 3rd to 8th. Different teachers had different teaching methods. Most of the teaching took place in English. If any child had any ~~the~~ doubt the teachers addressed it ~~at~~ ⁱⁿ ~~the~~ ^{class}. Most of the students interacted in class. They responded to the questions asked by teachers and gave ~~the~~ ^{their} teachers questions about the ~~to~~ ^{topic}.

There was no discrimination between the children. Children who lacked were given special attention. No teachers tried to make the class as interesting as possible and also gave activities to perform.
