PREFACE

Law, being a vital part of any human being's existence, must be known to everyone. Legal Education, in today's era, not only includes the theoretical aspect of the legislative provisions but also must include the participative and experiential learning. School of Legal Studies, K.R. Mangalam University, envisage imbibing such practical knowledge in addition to the theory subjects in the law students.

This handbook is prepared with a great effort by the faculties of School of Legal Studies where the syllabus of all the courses are offered for BALL.B.(H) program as per Learning Outcome Curriculum Framework (LOCF). The Syllabus has been revised as per the latest amendments and duly approved by Board of Studies and Academic Council of the University. The integrated course of 5 year BA LL.B.(H) consists of 44 Core Courses, 8 Specialization Elective Courses (SEC) in each of the four specializations, a pool of 13 Departmental Specific Electives (DSE) courses, and 10 Ability Enhancement Compulsory Courses (AECC).

After pursuing this course, students will get expertise in the field of law with specialization in Business laws, Criminal Laws, Constitutional Laws or International Laws.

The syllabus is re-structured as per the required guidelines for Outcome Based Education.

The effort put in by all the faculties teaching at SOLS is acknowledged and appreciated.

The School of Legal Studies hopes that the revised Handbook of the program BA LL.B.(H) will help students in making an informed decision at the time of working with any Legal or Corporate Firm or engaged in any other legal services.

1. INTRODUCTION

The K.R. Mangalam Group has made a name for itself in the field of education. Over a period of time, the various educational entities of the group have converged into a fully functional corporate academy. Resources at KRM have been continuously upgraded to optimize opportunities for the students. Our students are groomed in a truly inter-disciplinary environment wherein they develop integrative skills through interaction with students from engineering, management, journalism and media study streams.

The K.R. Mangalam story goes back to the chain of schools that offered an alternative option of world-class education, pitching itself against the established elite schools, which had enjoyed a position of monopoly till then. Having blazed a new trail in school education, the focus of the group was aimed at higher education. With the mushrooming of institutions of Higher Education in the National Capital Region, the university considered it very important that students take informed decisions and pursue career objectives in an institution, where the concept of education has evolved as a natural process.

K.R. Mangalam University was founded in the year 2013 by Mangalam Edu Gate, a company incorporated under Section 25 of the Companies Act, 1956.

K. R. Mangalam University is unique because of its

- a. Enduring legacy of providing education to high achievers who demonstrate leadership in diverse fields.
- b. Protective and nurturing environment for teaching, research, creativity, scholarship, social and economic justice.

Objectives

- a. To impart undergraduate, post-graduate and Doctoral education in identified areas of higher education.
- b. To undertake research PROGRAMMEs with industrial interface.
- c. To integrate its growth with the global needs and expectations of the major stake holders through teaching, research, exchange & collaborative PROGRAMMEs with foreign, Indian Universities/Institutions and MNCs.
- d. To act as a nodal center for transfer of technology to the industry.
- e. To provide job oriented professional education to the pecia student community with particular focus on Haryana.

Catalogue Description

In our daily lives we make many promises which raise a reasonable expectation in the mind of the other person that such promises would be fulfilled. But not every kind of promise gives rise to legal consequence if not performed. Only those promises which the law requires to be legally enforceable fall into the category of contract. The general principles relating to formation and enforceability of contract are enshrined in the in the Indian Contract Act, 1872. The objective of this paper is to make students familiar with various principles of contract formation enunciated in the Indian Contract Act, 1872.

The contract of sale and purchase of goods is also governed by another important central legislation, Sales of Goods Act, 1930. This course also aims to equip students with the basic knowledge of

Sales of Goods Act, 1930.

Catalogue Description

Tort is a substantive law which defines various forms of civil wrongs and their liability. The law of Tort in India is developed and evolved from the law of Torts in UK. In fact, most of the landmark judgments used in an action of Tort in India are from the House of Lords / Courts in England. A

tort is any civil wrong for which the law provides a remedy. Torts provide compensation for injuries to persons and property caused by the fault of another. The purpose of tort law is to restore someone who has been injured as a result of the wrong of another to the condition they were prior to the injury by awarding them monetary damages which will pay for medical expenses, lost wages and compensate for physical and mental pain and suffering as a result of their injuries. Although, enactments like Motor Vehicles Act 1988, The Human Rights Protection act 1998, Consumer Protection act 1986, Environment Protection act 1986 were introduced as a form tortious liability in India but there is no codification of law of tort in our country and damages can be vary from case to case. The subject focuses on the nature of tort and liability. Tort law is essential in India and is conducive for the growth and development of the society. After completion of course the students will have the basic knowledge of tort, how to apply the law in court and to get compensation from the court in any damage. The students will also learn how to take general defences if their client is involved in any tort.

They will also get to know about the concept of trespass, nuisance and defamation and how it is different from the crime. The students will also have the knowledge of remedies under tort and the consumer protection Law.

Catalogue Description

Legal History deals with the changes that took place in the colonial times in the Indian society and the economy in general, the legal system in particular. It seeks to answer some basic questions. How did contemporary India emerge? What were the processes and events that shaped it? Why and how did the present legal system evolve? What were the various ideas and elements that went into the making of British policies? What were the changes that took place in the courts and laws in the colonial times and how they impacted the Indians and their old systems? How did Indian Nationalism emerge & what were the forms it took? What were the concerns of the framers of the constitution? Finally, how the concept of Indian secularism emerged during the national movement and was adopted post-independence.

Catalogue Description

Constitutional Law is a body which defines the role, powers, and structure of different entities within a state, namely, the executive, the parliament or legislature, and the judiciary, as well as the basic rights of citizens. Another main function of constitutions may be to describe the procedure by which parliaments may legislate. Constitutional law is a major focus of legal studies and research. Dicey identified three essential elements of the British Constitution which were indicative of the rule of law:

1. Absolute supremacy of regular law as opposed to the influence of arbitrary power
2. Equality before the law
3. The constitution is a result of the ordinary law of the land.

The second is that all men are to stand equal in the eyes of the law”....no man is above the law.....every man, whatever be his rank or condition, is subject to the ordinary law of the realm and amenable to the jurisdiction of the ordinary tribunals.

Overview:

Indian Penal Code is a substantive law which defines various crimes that are punishable in India. Though this Code consolidates the whole of the law on the subject and is exhaustive on the matters in respect of which it declares the law, many more penal statutes governing various offences have been created in addition to this code. The Indian security system has been one that has gone through a lot of tests and examinations throughout the time. This is due to the political as well as the social situation of the country. India is a land of diverse cultures and traditions and it is a place where people from various religions as well as ethnic backgrounds live together. The Indian Penal Code

has its roots in the times of the British rule in India, formulated in year 1860. Amendments have been made to it in order to incorporate a lot of changes and jurisdiction clauses. The total number of sections contained in the Indian Penal Code is five hundred eleven. All these sections pertain to a particular category of crimes committed by civilians of Indian origin. The Indian Penal Code is thus the most fundamental document of all the law enforcers as well as the entire judiciary in India. The Indian Penal Code has a basic format, it's a document that lists all the cases and punishments that a person committing any crimes is liable to be charged. It covers any person of Indian origin. The exceptions are the military and other armed forces, they cannot be charged based on the Indian Penal Code. They have a different set of laws under the Indian Penal Code as well.

UNIT I

Introduction to Substantive Criminal Law: Extent and operation of IPC, Definition of Crime

Fundamental elements of crime- Common Law principle of *actus non facit reum, nisi mens sit rea* and exceptions to this principle - Strict liability offences- The four elements that go to constitute a crime are as follows: *first*, a human being under a legal obligation to act in a particular way and a fit subject for the infliction of appropriate punishment; *secondly*, an evil intent or *mens rea* on the part of such human being; *thirdly*, *actus reus*, i.e., act committed or omitted in furtherance of such an intent; and *fourthly*, an injury to another human being or to society at large by such an act.

Stages in commission of crime- Intention, Preparation, Attempt, Actual Commission of offence

Difference between crime and other wrongs- In order to draw a distinction between civil and criminal liability, it becomes necessary to know clearly what is a wrong of which all the three are species. Law either awards punishment or damages according to the gravity of the wrong done. If the law awards a punishment for the wrong done, we call it a crime; but if the law does not consider it serious enough to award a punishment and allows only indemnification or damages, we call such a wrong as a civil wrong or tort. In order to mark out the distinction between crimes and torts, we have to go deep into the matter and study it rather elaborately.

UNIT II

Elements of Criminal Liability: Joint and Constructive Liability, Common Intention & Common Object- Provisions for providing for group liability in crimes including sections 34 and 149 of the IPC are exceptions to the general rule of criminal liability that a man should be held liable for his own criminal acts and not for those of others. These provisions providing for vicarious liability/group liability are intended to deter people from committing

offences in groups and to spare the prosecution to prove specific *actus reus* of each member of the group

Criminal Conspiracy- Conspiracy precedes the commission of a crime and is complete before the crime is attempted or completed. A mere agreement to commit an illegal act is sufficient to constitute the offence of criminal conspiracy.

Theories of Punishment- Reformative, Retributive, Punitive, Deterrent, Expiatory

Kinds of Punishment: Punishments prevalent in the World- Flogging, Banishment, Whipping, Mutilation, Stoning, Pillory, Death Penalty, solitary confinement, fine, security bond.

Punishments in India- Section 53-74, Capital Punishment

UNIT III

General Exceptions –A person may not always be punished for a crime that he has committed. Section 76- 106 covers defences that exculpate criminal liability which includes Mental incapacity, Minority & Insanity, Involuntary intoxication, crime done with consent-

Private Defence - The right of private defence has come to be recognized by all civilized societies as a preventive and protective right where the state protection is not available; this right is essentially protective and preventive and never punitive. There are limitations on the exercise of this right both in relation to offences against human body and specific offences against property. The extent of this right, against whom it can be exercised, when this right commences and how long it lasts are dealt with elaborately in IPC.

Abetment- Abetment as a crime where a person helps another in commission of crime comes under Section 107-120 of the Code.

UNIT IV

Offences against State & Public Tranquility: These kind of offences are not only an offence against the person and property of an individual but also an offence against the State. They are group offences which are generally committed by a large number of people resulting in breach of peace. Broadly they can be categorized into- Waging War, Sedition, Rioting, Affray.

SEMESTER V

SOLS 303A	Law of Evidence	L	T	P	C
Version 1.0		3	1	0	4
Pre-requisites/Exposure	--				
Co-requisites	--				

Course objectives-

1. To provide students with detailed knowledge and skills in the rules of evidence and procedure as they apply to civil and criminal trials
2. To study the law pertaining to collection and use of evidence both primary and secondary.
3. To acquaint the students with the rules of evidence in relation to relevancy of facts and proof.
4. To equip students to deal with the more specialised principles covered in Law of Evidence A and apply such principles in a practical working legal environment

Course Outcomes-

CO1 Students will be able to analyse and define the concept and general nature of evidence

CO2 Students will be able to Illustrate the different types of evidence and court procedures relating to evidence.

CO3 Students will be able to analyse the rule relating to relevance of evidence

CO4 Students will be able to analyse and evaluate the rules governing examination in chief, cross examination and re-examination, and establish the procedures in the conduct of a civil or criminal trial

Catalogue Description

The law of evidence is also concerned with the quantum (amount), quality, and type of proof needed to prevail in litigation. The rules vary depending upon whether the venue is a criminal court, civil court, or family court, and they vary by jurisdiction. The quantum of evidence is the amount of evidence needed; the quality of proof is how reliable such evidence should be considered. Important rules that govern admissibility concern hearsay, authentication, relevance, privilege, witnesses, opinions, expert testimony, identification and rules of physical evidence. There are various

standards of evidence or standards showing how strong the evidence must be to meet the legal burden of proof in a given situation, ranging from reasonable suspicion to preponderance of the evidence, clear and convincing evidence, or beyond a reasonable doubt. Criminal charges lead to serious consequences for the accused. Therefore, in criminal cases, the level of proof required to resolve a case is very high. It is a strict requirement and the party alleging the crime must prove the claim beyond all reasonable doubt. Therefore, a case that goes to trial must be robust in its legal submissions and be able to prove the claim being made by the party. The laws have declared that certain types of documents and certain articles of evidence have more weight than others, and would prove the claim convincingly. This can be done by producing relevant documents, or eye witnesses to the offending incident or circumstantial evidence that increases the probability of the incident.

CO1 The students will be able to analyze the provision relating to procedural law

CO2 The students will learn how to prepare a civil suit

CO3 The students will learn about the interim applications mentioned in the subject.

CO4 The students will have the knowledge of appeals and other provisions of the civil procedural law.

Catalogue Description Civil Procedure Code is subject of daily use by the courts and lawyers. Students cannot afford to have scant knowledge of civil procedure when he goes out to practice as a lawyer. True that it is through experience one gets expert knowledge of civil procedure. However, it is necessary to have good grounding in the subject before one enters the profession. While the substantive law determines the rights of persons affected by action, judicial decisions will supply the omissions in the law.

Catalogue Description

This course discusses the preliminary concepts associated with the determination and measurement of aggregate macroeconomic variable like savings, investment, GDP, money, inflation, and the balance of payments. Macroeconomics is an analysis of a country's economic structure and performance and the government's policies in affecting its economic conditions. Macroeconomics can progress as it tests a particular theory to see how the overall economy functions, whereby the theory is used to forecast the effects of a particular policy and event that was carried out. This course introduces various alternative theories of output and employment determination in a closed economy in the short run as well as long run, and the role of policy in this context. It also introduces

the students to various issues related to an open economy. Macroeconomics deals with the monetary and fiscal policies which will be used to control inflation, reduce fiscal deficit, maintain full employment and price stability for the satisfactory economic growth. This course introduces the students to formal modeling of a macro-economy in terms of analytical tools.

Catalogue Description

International law covers principles and rules that govern the relations between States and the latter's interactions with other international actors. The course is designed to give students a global understanding of the rules governing international relations and, ultimately, provide them with practical skills in legal reasoning and arguing, research and writing on international issues. The

course will start with an introduction to the international legal order, including a presentation of the specificities of international law as compared to domestic law. It will then focus on core areas of public international law which involve the following questions: Who are the actors in the international legal system and to whom does international law apply? How is international law created and where can it be found? What are the fundamental principles of public international law, besides the multitude of international rules, with a special focus on one of them, namely the prohibition of the use of force? Finally, in case of breaches of international rules, how does international law react to such breaches? The objective of this paper is to provide knowledge to the students regarding the Public International Law to enable them to deal with the transnational legal order.

Catalogue Description

Labour law arose in parallel with the Industrial Revolution as the relationship between worker and employer which changed from small-scale production studios to large-scale factories. Workers sought better conditions and the right to join a labour union, while employers sought a more predictable, flexible and less costly workforce. The state of labour law at any one time is therefore both the product of and a component of struggles between various social forces.

These early efforts were principally aimed at limiting child labour. From the mid-19th century, attention was first paid to the plight of working conditions for the workforce in general. In 1850, systematic reporting of fatal accidents was made compulsory, and basic safeguards for health, life and limb in the mines were put in place from 1855. Further regulations, relating to ventilation, fencing of disused shafts, signalling standards, and proper gauges and valves for steam-boilers and related machinery were also set down.

A major issue for any business is to understand the relationship between the worker and the master. There are two types of workers, independent contractors and employees. They are differentiated based on the level of control the master has on them. Workers provided tools and resources, closely supervised, paid regularly, etc., are considered employees of the company. Employees must act in the best interest of the employer. Minimum wages are regulated and stipulated in some countries that lack explicit laws. In Sweden minimum wages are negotiated between the labour market parties (unions and employer organizations) through collective agreements that also cover non-union workers at workplaces with collective agreements.

Catalogue Description Litigation is time consuming and expensive. Hence alternative methods of dispute settlement for inexpensive and timely justice have been created by Parliament. For this reason ADR is appreciated by many countries around the world. India also became part of this change in the year 1996 when it enacted the Arbitration and Conciliation Act. The Act is replica of the UNCITRAL Model Law. The course attempts to train students in the art of making a choice between litigation and these alternative methods and also in science of using these alternate methods. The goal of the course is to help the students to understand the various methods of resolving disputes under ADR system, so that they can help their clients and society to select and apply the most effective, just and humane methods.

CO3 The students will have an understanding of the Design Act.

CO4 The students will know the Trademark Act and other related Intellectual Properties .

Catalogue Description

Intellectual Property Rights will give the learner an insight into how human progress depends on human creativity or intellectual skills. The legal protection of such creativity enables society's development in technology, business practices, art, literature and music. It is essential for the Indian law student to know the legal framework which encourages and sustains this creativity underlying each country's economy. This human capital like any other property can be stolen, misused and wrongly appropriated by those who have nothing to do with the efforts in making this capital. This destroys the identity of the creator and deprives him/her of its monetary and other benefits. In a globalized world this destruction and deprivation has been recognized and is sought to be prevented by international treaties. Today's law person is incomplete without knowledge of the legal remedies to prevent, prohibits and account for the infringement and theft of the intellectual property. The

student will be taught the Patents Act 1970, Copyright Act 1957, Trademarks Act 1999, Designs Act 2000, the Semi-conductor, & Integrated Circuits Layout Design Act 2000, the Biological Diversity Act, The Geographical Indication of Goods (Regulation & Protection) Act 1999, in the context of the evolution of those rights and the international treaties/agreements. The Student will learn the changing dimensions of IPR. This will explain the changes in Intellectual Property Regime, the emergence of new intellectual property rights, the influence of intellectual property regime in different countries and role of traditional knowledge in transforming IPR system etc.

Catalog Description

This course deals primarily with the two major forms of taxes in India, i.e. income tax and the Goods and Services Tax (GST). A conceptual framework is developed in the first lecture that serves as a link across various topics in the course and to present the tax laws and practices as a meaningful, integrated and coherent whole rather than as a fragmented set of compartmentalized rules. The broad concepts raised in the framework explicitly outline fundamental issues that need to be addressed whenever any type of tax is to be imposed in any State by any level of government.

This conceptual approach is intended to facilitate students to consciously think about the underlying considerations that drive the enactment/implementation of specific tax laws/practices

Catalogue Description

The State of India's poor does not feature much in Indian law Curricula. Only a few law schools offer an optional course. The Constitution of India - especially Article 39-A since 1976 commands innovation of legal system in such ways that no one, especially because of economic condition, is denied access to the law and its benefits. In so far as legal education is a state-funded or sponsored action and even otherwise, this Directive Principle must apply to renovation of legal education. The constitutional PROGRAM of social justice displays a dramatic concern for the "weaker sections of society". Steadily, legislation protecting their entitlements has grown to impressive proportion in the last forty years. They would be advocates, counselors, judges, teachers; scientists in law ought to have a complete grounding in these legal processes of "development". The burgeoning "poverty law" involves: (a) constitutional provisions' (b) legislation; (c) administrative anti-poverty programs aimed at improving economic condition f the poor; (d) legal services programs; (e) adjudication on the entitlement of the poor through social action litigation. All these need careful study in this

compulsory course.

Catalogue Description The constitution of India promises every Indian human to live a dignified life and the Indian State is bound to ensure this. Poverty, pollution and malnutrition with increasing inequality of access to resources essential for human dignity deny human dignity to the majority of Indians. One of the reasons for this is the inequality and denial of access to effective legal help. This course seeks to make the students aware of this negation of the rule of law and their role in actively remedying this to make law socially relevant and help them to learn how to provide the legal help and spread the legal awareness in the society

Catalogue Description

Comparative constitutional law is the study of differences and similarities between the laws of different countries. The importance of comparative law has increased enormously in the present age of internationalism, economic globalization, and democratization. An important question raised by the growth of the field of comparative constitutional law is how to define the outer boundaries of the phenomenon to be studied. The study of comparative constitutional law, most scholars agree, is something distinct from the study of comparative private law or non-constitutional law, but scholars also differ significantly in how they draw this distinction. A second approach focuses on the idea of entrenchment, or the degree to which certain legal rules are immune from change by ordinary as opposed to super-majority legislative processes, either as a matter of legal form or political

convention. While formal entrenchment may often coincide with a text-based approach (i.e. whether a norm is included in a written document labeled constitutional), other norms can be informally entrenched as a practical matter, and hence might be considered constitutional in some sense. A third approach, which is more common among contributors is more functional, and defines the constitutional domain by reference to the role of constitutions in both ‘checking’ and ‘creating’ government power. Comparative constitutional law is an intellectually vibrant field that encompasses an increasingly broad array of approaches and methodologies. This series collects analytically innovative and empirically grounded work from scholars of comparative constitutionalism across academic disciplines. Books in the series include theoretically informed studies of single constitutional jurisdictions, comparative studies of constitutional law and institutions, and edited collections of original essays that respond to challenging theoretical and empirical questions in the field.

CO3 The students will have an understanding of statutory interpretation while working collaboratively.

CO4 The students will know the legal research principles and methods in interpreting legal instruments.

Catalogue Description

Legislation dominates the contemporary legal landscape. Almost all fields of legal regulation involve legislation in some form. The ability to interpret and understand the operation of legislation is a skill essential to understanding law and its operation.

This course will provide an advanced study of the rules and principles governing statutory interpretation. Students who have encountered statute law in a variety of contexts (criminal law, torts law, administrative law etc.) and been introduced to the relevant common law principles, will benefit from a more detailed consideration of statutory interpretation as a fundamental skill involved in all areas of practice but particularly those areas involving government.

Catalogue Description

Competition is the act of the sellers individually seeking to acquire the patronage of buyers in order to achieve profits or market share. The Competition Act, 2002 was enacted by the Parliament of India and replaced The Monopolies and Restrictive Trade Practices Act, 1969. Course objective of competition law is to prohibit firms for engaging in conduct which will distort the competitive process and harm competition by, for example, preventing firms from indulging in anti-competitive agreements, preventing firms with a powerful position on a market from abusing their market power.

The Act mainly covers

- Prohibition of anti- competitive agreements.
- Prohibition of abuse of dominance.
- Regulation of combination (acquisition, mergers, and amalgamation of certain size)
- Establishment of the competition commission of India.
- Power and functions of the competition commission of India.

The main features of competition Act is to

-to prevent practices having adverse effect on competition, -to promote and sustain competition in markets, -to protect the interests of consumers, -to ensure freedom of trade carried on by other participants in markets in India and for matters connected therewith or incidental thereto.

Catalogue Description

The technology industry in India has seen a lot of growth over the past few years. While technology has impacted India in positive ways, it also has certain adverse effects. The advancement and rise in technology have seen a bump in the number of cyber-scams, data-theft and cyber bullying, among other things. So, in order to decrease these “cyber-crimes”, the Indian government enacted the Information Technology Act in the year 2000 in order to address this new range of new-age crimes by implementing Cyber law.

It takes care of the legal issues related to the World Wide Web and rectifies them. Aspirants willing to pursue Cyber Law have to deal with the criminal activities conducted on the internet such as theft, fraud, defamation and forgery.

The students will understand about the internet, freedom of expression, online privacy as well as relevant usage of the internet.

After completing the course, students will be able to learn about the various various classifications and types of cybercrime, Intellectual Property Rights over cyberspace, issues related to online contract, and various authority under IT Act.

Catalogue Description

International environmental law is a branch of public international law - a body of law created by States for States to govern problems that arise between States. It is concerned with the attempt to control pollution and the depletion of natural resources within a framework of sustainable development. Multilateral environmental agreements are a subset of the international conventions acknowledged by Article 38 (1) of the Statute of the International Court of Justice as a source of

international law with specific focus on environmental matters. we have so many judicial decision and juristic writings but these are not source of binding law in and of themselves, but are subsidiary means of determining the law. International Convention International Customary Law General Principles Judicial Decisions Juristic Writings International environmental law covers topics such as biodiversity, climate change, ozone depletion, toxic and hazardous substances, desertification, marine resources, and the quality of air, land and water. It also has synergies with related areas of international law like international trade, human rights, international finance, and so on. International Environment law gives a detail understanding on environmental issues at international level.

3. To enhance awareness of Refugee’s conditions and protection from violations.
4. To outline the laws and enforcement machineries to protect human rights in India

Catalogue Description:

International Humanitarian Law (IHL) and Human Rights Law are complementary. They both seek to protect human dignity, though they do so in different circumstances and in different ways. Human rights law applies at all times and in all circumstances, and it concerns all persons subject to the jurisdiction of a State. Its purpose is to protect individuals from arbitrary behavior by the State. Human rights law, therefore, continues to apply in times of armed conflict. However, human rights treaties, such as the International Covenant on Civil and Political Rights, the European Convention and the American Convention on Human Rights authorize derogations under stringent conditions from some rights in time of “public emergency which threatens the life of the nation,” of which armed conflict is certainly an example. It was under the influence of the United Nations (U.N.) and

the Universal Declaration of Human Rights of 1948 that the development of human rights began in earnest. Two important covenants were signed in 1966: the International Covenant on Civil and Political Rights (first generation of human rights) and the International Covenant on Economic, Social and Cultural Rights (second generation of human rights). The first covenant remains the standard. It has served as a model for many other treaties as well as national charters of rights and freedoms. The second one, on the other hand, saw its impact limited by the potential for economic development in each country and by regional characteristics. The third generation of human rights involves emerging universal rights such as the right to development, peace, a healthy environment, etc. However, those rights have yet to be clearly defined or enforced. Human rights have also been recognized through regional organizations: European Convention for the Protection of Human Rights and Fundamental Freedoms (1950, Council of Europe), American Convention on Human Rights (1969, Organization of American States), African Charter on Human and Peoples' Rights (1981, Organization of African Unity).

Catalogue Description

Private international law refers to that part of the law that is administered between private citizens of different countries or is concerned with the definition, regulation, and enforcement of rights in situations where both the person in whom the right inheres and the person upon whom the obligation rests are private citizens of different nations. It is a set of rules and regulations that are established or agreed upon by citizens of different nations who privately enter into a transaction and that will govern

rn in the event of a dispute. In this respect, private InternationalLaw differs from public international law, which is the set of rules entered into by the governments of various countries that determine the rights and regulate the intercourse of independent nations.

The course aims to provide a general grounding in private international law as applied in international civil and commercial litigation, focusing primarily on jurisdiction, recognition and enforcement and choice of law.

The course will concentrate on contractual and noncontractual obligations but will also provide an introduction to the cross-border aspects of selected other areas of private and commercial law. The course will combine English and Indian law, and will also cover the relevant international instruments relevant for this area of the law.
