SLCH125A	ENVIORNMENTAL STUDIES	L	T	P	C
		3	0	0	3

OVERVIEW:

Everything that surrounds and affects living organisms is environment. Environment includes all those things on which we are directly or indirectly dependent for our survival, whether it is living or biotic components like animals, plants or non-living or abiotic components like soil, air and water etc. It belongs to all, influences all and is important to all.

Environmental Protection Act (1986) defined “Environment as the sum total of water, air and land, their interrelationship among themselves and with the human beings, other living organisms and materials.” Environmental studies are important since it deals with the most mundane problems of life like hygienic living conditions, safe and clean drinking water, fresh air, healthy food and sustainable development.

The syllabus for Environmental Studies includes conventional class room teaching as well as field work. In this course the teacher simply acts as a catalyst to infer what the student observes or discovers in his/her own environment. Involvement of students in project work is one of the most effective learning tools for environmental issues. This syllabus is beyond the scope of text book teaching and also the realm of real learning by observing the surroundings. The content of this course provides an OVERVIEW of introduction to environment, concept of an ecosystem,

various renewable and non-renewable resources, how are various biodiversity occur and different means to conserve these. This course also includes various types of pollution and environmental policies & practices related with environs. Finally, it also highlights the relationship of human population with environment. The course further integrates to project work such as visit to an area to document environmental assets river/ forest/ grassland/ hill/ mountain, visit to a local polluted site-Urban/Rural/Industrial/Agricultural, study of common plants, insects, birds, and study of simple ecosystems. These studies are as imperative as it forms a unique synergistic tool for comprehensive learning process. This will help students to recognize and appreciate how the technological advancement at global level, exponential growth of human population and their unlimited demands has put the environment at stake and has contaminated the environment worldwide.

COURSE OBJECTIVE AND EXPECTED OUTCOME:

The main objective of the course is to create consciousness among the students with the idea about healthy and safe environment. This course is aimed to explain students that the rapid industrialization, crazy consumerism and over-exploitation of natural resources have resulted in

degradation of earth at all levels. These changes need the discussion, concern and recognition at national and international level with respect to formulate protection acts and sustainable developments policies. It can be possible only if every citizen of the nation is environmentally educated and gets involved into this matter at the grass root level to mitigate pollution.

After studying the course, the learners will be able to comprehend and become responsive regarding environmental issues. They will acquire the techniques to protect our mother earth, as without a clean, healthy, aesthetically beautiful, safe and secure environment no specie can survive and sustain. This is the only inheritance which every genera of specie passes to their future generation.

SOLS110A	LAW OF CONTRACT - II	C
		4

Overview:

In our daily lives we make many promises which raise a reasonable expectation in the mind of the other person that such promises would be fulfilled. But not every kind of promise gives rise to legal consequence if not performed. Only those promises which the law requires to be legally enforceable fall into the category of contract. The general principles relating to formation and enforceability of contract are enshrined in the Indian Contract Act, 1872. The objective of this paper is to make students familiar with various principles of contract formation enunciated in the Indian Contract Act, 1872.

Course Objective and Expected Outcomes: This paper is to impart knowledge various special contract, law of agency and specific reliefs. In the society wherein all major ventures are getting corporatized, a law student should acquaint himself with the knowledge of special contracts apart from equipping himself with general principles of contract. This law is contained in several legislations apart from the Indian Contract Act. This course equips the students to better appreciate the legal services required in a corporate office so that he can enhance his relevance as a lawyer in society.

SOLS 108A	LAW OF TORTS and CONSUMER	C
	PROTECTION ACT, 1986	4

Overview:

A tort is any civil wrong for which the law provides a remedy. Torts provide compensation for injuries to persons and property caused by the fault of another. There have always been concerns about whether there should be restrictions on tort law because of disagreements about who should bear the financial burden for an injury and what injuries should be compensable. Powerful lobbies of doctors, hospitals, insurance companies and product manufacturers are always appealing to Legislatures to limit the ability of the public to obtain compensation for violations of tort law. Consumers who are injured by defective products, victims of sexual harassment, drunk drivers, and many other civil wrongs are always under attack with their legal ability to be compensated for their injuries.

The purpose of tort law is to restore someone who has been injured as a result of the wrong of another to the condition they were prior to the injury by awarding them monetary damages which will pay for medical expenses, lost wages and compensate for physical and mental pain and suffering as a result of their injuries.

To deal with the malicious behavior of the people tort existed in Hindu and Muslim law but it can be said that tort was formally introduced by the Crown in India. It is based on the principles of equity, justice, and good conscience. The law of torts is based on the principles of ‘common law’ which is mainly the English law of torts. The application of the law of tort is an applied selectively in Indian courts keeping in mind if it suits the circumstances of Indian society.

Objective and Expected Outcome: One moment you are walking on the road and the other you slip into the pit left open by the Municipal Corporation. Without having a glance around, you stand up quickly to cover up the embarrassment you have faced. But what can you do? This happens every now and then especially in a country like India. Is there anyone who could be blamed for this? I have sustained injuries so I should be more careful from the next time. Isn't it? No, there was a responsibility of Municipality in this situation. They were negligent in fulfilling their duty. This is what law of torts talks about and much more.

The objective of this paper is to equip students with knowledge of tort and consumer protection law with the help of leading cases.

After completing the course, students will be able to learn about

SLCS102A	Information Technology Fundamentals	L	T	P	C
		4	0	0	4

Course Overview: Computing and programming is essential to leverage the technical skills of a student. These techniques equip the students with know-how of the latest technologies and reduce considerable time in solving problems. Success in college and beyond requires computer and information literacy's that are flexible enough to change with a changing IT environment and adaptable to new problems and tasks. The purpose of the information technology requirement is to ensure that students achieve an essential understanding of information technology infrastructure encompassing systems and devices; and become more sophisticated technology users and consumers.

Objectives and Expected Outcomes: The main objective is to introduce IT in a simple language to all undergraduate students, regardless of their specialization. It will help them to pursue specialized programs leading to technical and professional careers and certifications in the IT industry. The focus of the subject is on introducing skills relating to IT basics, computer applications, programming, interactive media, Internet basics, etc.

The aims is to:

- 1. Understand basic functions of computer software components including operating system functions;**
- 2. Develop a critical attitude to gathering, processing and evaluating information;**
- 3. Develop a broad understanding of hardware, software, networks, databases and information systems and their uses;**
- 4. Sensitise students to the use of Information Technology in conducting and living their daily lives;**
- 5. Develop an awareness of the power and pitfalls of Information Technology.**

SLMC211A	MANAGING HUMAN CAPITAL	L	T	P	C
		4	0	0	4

Overview:

Human resources is used to describe both the people who work for a company or organization and the department responsible for managing resources related to employees. Human resource management is the strategic approach to the effective management of people in an organization, so that they help the business gain a competitive advantage. The overall purpose of this course is to ensure that the organization is able to achieve success through people. The students can specialize in recruiting, training, employee-relations or benefits, recruiting specialists, find, and get hired by top recruiters. Human resource management involves developing and administering programs that are designed to increase the effectiveness of an organization or business. It includes the entire spectrum of creating, managing, and cultivating the employer-employee relationship.

The concept behind human resource management is that employees who are subject to effective human resource management are able to more effectively and productively contribute to a company's overall direction, thereby ensuring that company goals and objectives are accomplished. Today's human resource management team is responsible for much more than traditional personnel or administrative tasks. Instead, members of a human resource management team are more focused on adding value to the strategic utilization of employees and ensuring that employee programs are impacting the business in positive and measurable ways.

Objective and Expected Outcome

Today's competitive business environment owes its success to effective management of its human resource. The quality of the organization's employees, their attitude, behaviour and satisfaction with their jobs, and their behaviour towards ethics and values and a sense of fair treatment all impact the firm's productivity, level of customer service, reputation, and survival. The objective of this course is to give students the knowledge, understanding and key skills that are required by today's HR professionals and to enable students to effectively contribute to dynamic organizations. Students will also gain an understanding of key terms, theories/concepts and practices within the field of human resource management. Students shall learn to identify and analyse the problems in the field of HRM and be able to provide innovative solutions. They shall be able to identify and appreciate the significance of ethical issues in HR practices and the management of people in the workplace.

The students of human resources management must be aware of basic aspects of human resource management to understand the functioning of human resource management in an organizational setting. Therefore, this course on Human Resource Management is designed for students to have

an understanding of the basic concepts, functions and processes of human resource management. During the study of this course, student know about the theory and application of human resource management, the broad range of influences acting on human resource management, about the human resources planning and policies through its information system, training and development of human capital of the organization. This course emphasis on the knowledge of performance assessment methods, improvements and resultant in terms of employee service condition reviews. Compensation and workers participation in management including the discipline matters and strategic human resources management. This course helps students to be aware of the role, functions and functioning of human resource department of the organizations and to design and formulate various HRM processes such as Recruitment, Selection, Training, Development, Performance appraisals and Reward Systems, Compensation Plans and Ethical Behaviour. This allows them to develop ways in which human resources management might diagnose a business strategy and then facilitate the internal change necessary to accomplish the strategy. This evaluates the developing role of human resources in the global arena.

SOLS 209A	LAW OF CRIMES - I (IPC) (GENERAL PRINCIPLES)	L	T	P	C
		3	1	0	4

Overview:

Indian Penal Code is a substantive law which defines various crimes that are punishable in India. Though this Code consolidates the whole of the law on the subject and is exhaustive on the matters in respect of which it declares the law, many more penal statutes governing various offences have been created in addition to this code. The Indian security system has been one that has gone through a lot of tests and examinations throughout the time. This is due to the political as well as the social situation of the country. India is a land of diverse cultures and traditions and it is a place where people from various religions as well as ethnic backgrounds live together. The Indian Penal Code has its roots in the times of the British rule in India, formulating in year 1860. Amendments have been made to it in order to incorporate a lot of changes and jurisdiction clauses. The total number of sections contained in the Indian Penal Code is five hundred eleven. All these sections pertain to a particular category of crimes committed by civilians of Indian origin. The Indian Penal Code is thus the most fundamental document of all the law enforcer as well as the entire judiciary in India. The Indian Penal code has a basic format, it's a document that lists all the cases and punishments that a person committing any crimes is liable to be charged. It covers any person of Indian origin. The exceptions are the military and other armed forces, they cannot be charged based on the Indian Penal Code. They have a different set of laws under the Indian Penal Code as well.

Objective and Expected Outcome:

Various offences in the Indian Penal Code have been drafted keeping in view various principles of criminal liability. For example, most offences specify the required state of mind as well as the prohibited act for imposition of criminal liability. However, many situations require deviation from these principles due to the involvement of more than one person in the action, or due to the resultant harm to society, or due to prevailing social and cultural norms contrary to constitutional principles of equality and liberty to all. The course of Law of Crimes-1 has been so designed as to enable the students to understand the general principles of criminal liability, to identify the ingredients of an offence, understand the range of state of mind required for different offences, as well as to sensitize the students about the inherent biases of criminal law against certain groups of people despite its claim of universality, neutrality and equality.

After completing the course, students will be able to learn about the various essentials which make an act punishable and also the different stages of crime.

UNIT I

Introduction to Substantive Criminal Law: Extent and operation of IPC, Definition of Crime

Fundamental elements of crime- Common Law principle of *actus non facit reum, nisi mens sit rea* and exceptions to this principle - Strict liability offences- The four elements that go to constitute a crime are as follows: *first*, a human being under a legal obligation to act in a particular way and a fit subject for the infliction of appropriate punishment; *secondly*, an evil intent or *mens rea* on the part of such human being; *thirdly*, *actus reus*, i.e., act committed or omitted in furtherance of such an intent; and *fourthly*, an injury to another human being or to society at large by such an act.

Stages in commission of crime- Intention, Preparation, Attempt, Actual Commission of offence

Difference between crime and other wrongs- In order to draw a distinction between civil and criminal liability, it becomes necessary to know clearly what is a wrong of which all the three are species. Law either awards punishment or damages according to the gravity of the wrong done. If the law awards a punishment for the wrong done, we call it a crime; but if the law does not consider it serious enough to award a punishment and allows only indemnification or damages, we call such a wrong as a civil wrong or tort. In order to mark out the distinction between crimes and torts, we have to go deep into the matter and study it rather elaborately.

UNIT II

Elements of Criminal Liability: Joint and Constructive Liability, Common Intention and Common Object- Provisions for providing for group liability in crimes including sections 34 and 149 of the IPC are exceptions to the general rule of criminal liability that a man should be held liable for his own criminal acts and not for those of others. These provisions providing for vicarious liability/group liability are intended to deter people from committing offences in groups and to spare the prosecution to prove specific *actus reus* of each member of the group

Criminal Conspiracy- Conspiracy precedes the commission of a crime and is complete before the crime is attempted or completed. A mere agreement to commit an illegal act is sufficient to constitute the offence of criminal conspiracy.

Theories of Punishment- Reformatory, Retributive, Punitive, Deterrent, Expiatory

Kinds of Punishment: Punishments prevalent in the World- Flogging, Banishment, Whipping, Mutilation, Stoning, Pillory, Death Penalty, solitary confinement, fine, security bond.

Punishments in India- Section 53-74, Capital Punishment

UNIT III

General Exceptions –A person may not always be punished for a crime that he has committed. Section 76- 106 covers defences that exculpate criminal liability which includes Mental incapacity, Minority and Insanity, Involuntary intoxication, crime done with consent-

Private Defence - The right of private defence has come to be recognized by all civilized societies as a preventive and protective right where the state protection is not available; this right is essentially protective and preventive and never punitive. There are limitations on the exercise of this right both in relation to offences against human body and specific offences against property. The extent of this right, against whom it can be exercised, when this right commences and how long it lasts are dealt with elaborately in IPC.

Abetment- Abetment as a crime where a person helps another in commission of crime comes under Section 107-120 of the Code.

UNIT IV

Offences against State and Public Tranquility: These kind of offences are not only an offence against the person and property of an individual but also an offence against the State. They are group offences which are generally committed by a large number of people resulting in breach of peace. Broadly they can be categorized into- Waging War, Sedition, Rioting, and Affray.

SOLS205A	LEGAL HISTORY	L	T	P	C
		3	1	0	4

Overview: Legal History deals with the changes that took place in the colonial times in the Indian society and the economy in general, the legal system in particular. It seeks to answer some basic questions. How did contemporary India emerge? What were the processes and events that shaped it? Why and how did the present legal system evolve? What were the various ideas and elements that went into the making of British policies? What were the changes that took place in the courts and laws in the colonial times and how they impacted the Indians and their old systems? How did Indian Nationalism emerge and what were the forms it took? What were the concerns of the framers of the constitution? Finally, how the concept of Indian secularism emerged during the national movement and was adopted post-independence.

SLMC113A	ACCOUNTING FOR BUSINESS	C
		4

Overview:

Any organization that deals with money or money's worth needs to record every transaction that it enters into. The courses in this product give a complete understanding, right from scratch to preparation and analysis of financial statements. The product is supplemented with a number of interactive exercises, in accordance with the 'learn by doing' approach.

This course is intended to introduce the basic theory, concepts and practice of financial accounting and to enable students to understand information contained in the published financial statements of companies and other organisations. It includes the preparation of accounting statements, along with providing great emphasis on its uses and limitations.

The course gives students the necessary background to:

- (1) Understand the concepts and measurements that underlie financial statements,
- (2) Develop the skills needed to analyze financial statements effectively, and
- (3) Gain an understanding of the choices enterprises make in reporting the results of their business activities.

The first part of the course emphasizes the measurement concepts and the mechanics of moving from business transactions to the principal financial statements: balance sheet, income statement, and statement of cash flows. The second part introduces tools for analyzing financial statements, with an emphasis on integrating industry economic and business strategic factors into the analysis and interpretations. The third part focuses on generally accepted accounting practices (GAAP) for particular topics, such as the timing of revenue recognition, inventory valuation, and measuring the amount and cost of debt financing, with an emphasis on how management's choices among alternative GAAP affect the quality of earnings and reported financial position. The course emphasizes interactive case discussions based on analysis of actual companies' financial statements. Accordingly, the course provides an opportunity to develop skills necessary to critically evaluate firms' actions and the efficiency with which they have managed their resources.

Objectives and Expected Outcomes:

After completing this course the students will be conversant with:

- Accounting Concepts
- Accounting Equation
- Rules of Accounting
- Recording the transaction
- Adjusting and rectifying the books
- Preparation of Financial Statements

- Analyzing Financial Statements

Further the students will be able to:

- State the uses and users of accounting information;
- Explain and apply accounting concepts, principles and conventions;
- Record basic accounting transactions and prepare annual financial statements; and analyse, interpret and communicate the information contained in basic financial statements and explain the limitations of such statements

Semester IV

SLMC218A	CONDUCTING RESEARCH FOR BUSINESS	L	T	P	C
		3	1	0	4

OVERVIEW

Research is something that anyone can do, and everyone ought to do. Research is about understanding and explaining – about ‘knowing’. This course is designed to introduce students to some of the methods and techniques of research and their methodological frameworks in their diverse and pluralistic nature, and to validate their purpose, relevance and effectiveness. This course provides a full coverage of the area of research, attempting to integrate all popular methodologies and methods, in both theory and practice. This course provides students with an overview of the variety of research methods used and the skills to determine which research method/s to use in order to satisfy their results. Research challenges, including appropriate selection of design, research participants, sample size, data collection, and selection of appropriate measures, data analysis and interpretation of results are studied. Concepts such as validity, reliability, and rigidity are examined in relation to the methodological approaches explored throughout the subject. Statistical tools and techniques used to analyse the data will also be discussed.

OBJECTIVES AND EXPECTED OUTCOMES

The primary objective of this course is to develop a research orientation among the students and to acquaint them with fundamentals of research methods. Specifically, the course aims at introducing them to the basic concepts used in research and their approach.

Research Methodology is a hands-on course planned to impart education in the foundational methods and techniques of academic research in social sciences and business management context. Through this course the students would examine and be practically exposed to the main components of a research framework i.e., problem definition, research design, data collection, ethical issues in research, report writing, and presentation. Once equipped with the proper knowledge, the students would be well-placed to conduct disciplined research under supervision in an area of their interest. In addition to their application in an academic setting, many of the

methodologies discussed in this course would be similar to those deployed in professional research environments.

At the completion of this course, students will have an understanding of the historical, theoretical and methodological foundations of research. They would be able to critically understand the research process: what it is, what it does, how it is used, when it is used and for what purpose, what methods it employs, how good they are and a host of other issues. This course would help to considerate the steps in research project planning using different methods and techniques, their relevance and their advantages and disadvantages. Also, the process of data collection; how data is analysed and interpreted, focusing on both quantitative and qualitative analysis.

SOLS212A	LAW OF CRIMES – II (IPC)	L	T	P	C
		3	1	0	4

Overview:

Indian Penal Code is a substantive law which defines various crimes that are punishable in India. Though this Code consolidates the whole of the law on the subject and is exhaustive on the matters in respect of which it declares the law, many more penal statutes governing various offences have been created in addition to this code. The Indian security system has been one that has gone through a lot of tests and examinations throughout the time. This is due to the political as well as the social situation of the country. India is a land of diverse cultures and traditions and it is a place where people from various religions as well as ethnic backgrounds live together. The Indian Penal Code has its roots in the times of the British rule in India, formulated in year 1860. Amendments have been made to it in order to incorporate a lot of changes and jurisdiction clauses. The total number of sections contained in the Indian Penal Code is five hundred eleven. All these sections pertain to a particular category of crimes committed by civilians of Indian origin. The Indian Penal Code is thus the most fundamental document of all the law enforcers as well as the entire judiciary in India. The Indian Penal code has a basic format, it's a document that lists all the cases and punishments that a person committing any crimes is liable to be charged. It covers any person of Indian origin. The exceptions are the military and other armed forces, they cannot be charged based on the Indian Penal Code. They have a different set of laws under the Indian Penal Code as well.

Objective and Expected Outcome:

Various offences in the Indian Penal Code have been drafted keeping in view various principles of criminal liability. For example, most offences specify the required state of mind as well as the prohibited act for imposition of criminal liability. However, many situations require deviation from these principles due to the involvement of more than one person in the action, or due to the resultant harm to society, or due to prevailing social and cultural norms contrary to constitutional principles of equality and liberty to all. The course of Law of Crimes-1 has been so designed as to enable the students to understand the general principles of criminal liability, to identify the ingredients of an offence, understand the range of state of mind required for different offences, as well as to sensitize the students about the inherent biases of criminal law against certain groups of people despite its claim of universality, neutrality and equality.

After completing the course, students will be able to learn about the various essentials which make an act punishable and also the different stages of crime.

SLMC116A	MARKETING FOR CONTEMPORARY BUSINESS	C
		4

Overview:

Marketing is the core of an operating business. It is an organizational philosophy and a set of guiding principles for interfacing with customers, competitors, collaborators, and the environment. Marketing entails planning and executing the conception, pricing, promotion, and distribution of ideas, goods, and services. It starts with identifying and measuring consumers' needs and wants, assessing the competitive environment, selecting the most appropriate customer targets and developing marketing strategy and implementation program for an offering that satisfies consumers' needs better than the competition. This course will help students to improve their ability to make effective marketing decisions, including assessing marketing opportunities and developing marketing strategies and implementation plans. The course focuses on situation analysis (5Cs: company, customers, competitors, collaborators, and context), market opportunity identification, and formulating marketing strategy. It introduces the key constructs such as value of products, customers and brands, customer segmentation, and product positioning. The course examines how to use these ideas to make specific decisions about the marketing mix (4Ps: product, price, promotion, and place) and also provides the skills needed to design a marketing strategy and its implementation plan.

Objectives and Expected Outcomes:

The course investigates marketing from a managerial perspective, including the critical analysis of functions of marketing opportunity assessment, marketing planning, marketing implementation, evaluation and control of the marketing effort. This course is appropriate for majors in all functional areas of business. While marketing managers develop and implement marketing strategy, managers in other functional areas (finance, management, accounting, and operations) need to understand how marketing strategies impact their own operations. Entrepreneurial ventures and start-ups rarely succeed without an excellent marketing strategy. It is impossible to value a firm and its stocks and bonds, to plan its financial needs, or to establish its credit rating without understanding its revenue sources. Revenues largely come from customers and are a direct consequence of firm marketing strategy.

This course helps students to improve their ability to:

- Assess market opportunities by analysing customers, competitors, collaborators, context, and the strengths and weaknesses of a company.
- Develop effective marketing strategies to achieve organizational objectives.
- Design a strategy implementation program to maximize its chance of success.
- Communicate and defend your recommendations and critically examine and build upon the recommendations of your classmates both quantitatively and qualitatively.
- Understand the dynamics of marketing in business
- Apply the theoretical marketing concepts to the practical situations
- Demonstrate the ability to carry out a market research projects

- To communicate unique marketing mixes and selling propositions for specific products
- Construct written sales plans and professional interactive presentations

SLMC214A	ACCOUNTING FOR FINANCIAL AND PUBLIC UTILITY UNDERTAKINGS	C
		4

Overview:

Accounting for Financial and Public utility undertakings/ corporate accounting concerns itself with the activities of only one firm, the firm that employs the accountant. In this course, we'll see how that can actually mean that the accountant has a diverse workload.

Many of us have a mental image of an accountant as someone who is doubled over a green tinged light pouring over numbers. Or perhaps it's someone you only see in the spring as tax season approaches. However, the fact is that there are many different categories of accountants out there. One of the most important is those who practice **corporate accounting**, which means that they keep track of just one firm's records. In this course, we'll look at the type of work that a corporate accountant performs. We'll also look at some of the major factors that differentiate corporate accounting from the public accounting that you may be used to thinking about.

Corporate accounting is a branch of financial accounting that studies the accounting process of those operations that present specific unique features according to the legal studies of the future engaging in the business activity. Accounting is the process of giving people information about the finance of an organization is often referred to as the language of business because the information provided is generally in a consistent format and is based on generally accepted principles.

Objective and Expected Outcome:

Candidates will develop knowledge of accountancy, more in-depth and broader study of its contents and study the accounting problems associated with the incorporation of public limited or joint stock companies, modifications of company capital, external financing through debt securities and application of income. They will have numerical and quantitative skills that will be developed through understanding, recording and evaluation figures within a business context. They will have problem-solving and analytical ability as well. They will have good communication skills both verbal and written as they should communicate with upper management and other employees within an organization.

The course is beneficial to assist in the intellectual, social and personal development of the student as preparation for entrance to a range of specialist and generalist business profession. It is beneficial for students to move into areas such as MBA, M.Com, CA, CS, ICWA, Finance, Insurance, Consultancy, Computer Accounting etc. Graduates can work in many occupations, including financial analyst and human resources officer, as well as in marketing, accountancy, international trade, administration and advertising.

SOLS 303A	LAW OF EVIDENCE	L	T	P	C
		3	1	0	4

Overview:

The law of evidence is also concerned with the quantum (amount), quality, and type of proof needed to prevail in litigation. The rules vary depending upon whether the venue is a criminal court, civil court, or family court, and they vary by jurisdiction. The quantum of evidence is the amount of evidence needed; the quality of proof is how reliable such evidence should be considered. Important rules that govern admissibility concern hearsay, authentication, relevance, privilege, witnesses, opinions, expert testimony, identification and rules of physical evidence. There are various standards of evidence or standards showing how strong the evidence must be to meet the legal burden of proof in a given situation, ranging from reasonable suspicion to preponderance of the evidence, clear and convincing evidence, or beyond a reasonable doubt. Criminal charges lead to serious consequences for the accused. Therefore, in criminal cases, the level of proof required to resolve a case is very high. It is a strict requirement and the party alleging the crime must prove the claim beyond all reasonable doubt. Therefore, a case that goes to trial must be robust in its legal submissions and be able to prove the claim being made by the party. The laws have declared that certain types of documents and certain articles of evidence have more weight than others, and would prove the claim convincingly. This can be done by producing relevant documents, or eye-witnesses to the offending incident or circumstantial evidence that increases the probability of the incident.

Objective and Expected Outcome:

To provide students with detailed knowledge and skills in the rules of evidence and procedure as they apply to civil and criminal trials as might be relevant to a person working in a legal office, an insurance company or associated fields in the public or corporate sectors. Knowledge of the rules of evidence will enable analysis and evaluation of evidence available in connection with the preparation of a case for trial. Upon successful completion of the course the students will be able to analyse and define the concept and general nature of evidence, and illustrate the different types of evidence and court procedures relating to evidence, to analyse the rule relating to relevance of evidence, analyse and evaluate the rules governing examination in chief, cross examination and re-examination, and establish the procedures in the conduct of a civil or criminal trial.

SOLS 307A	CIVIL PROCEDURE CODE, 1908 and LIMITATION ACT, 1963	L	T	P	C
		3	1	0	4

Overview:

Civil Procedure Code is subject of daily use by the courts and lawyers. Students cannot afford to have scant knowledge of civil procedure when he goes out to practice as a lawyer. True that it is through experience one gets expert knowledge of civil procedure. However, it is necessary to have good grounding in the subject before one enters the profession. While the substantive law determines the rights of persons affected by action, judicial decisions will supply the omissions in the law.

The Code of Civil Procedure in India has a chequered history and lays down the details of procedure for redressal of civil rights. Many questions may pop up when one goes to vindicate one's civil rights. The court where the suit is to be filed, the essential forms and procedure for institution of suit, the document in support and against, evidence taking and trial, dimensions of an interim order, the peculiar nature of the suit, the complexities of executing a decree and provision for appeal and revision are all matters which a lawyer for any side is to be familiar with.

A delay in filing the suit, besides indicating the negligence of the plaintiff in effectively agitating the matter on time, may place court in a precarious situation. They may not be in a position to appreciate the evidence correctly. Evidence might have been obliterated. Hence, the statute of limitation fixes a period within which a case has to be filed. The students should know how the court fee stamp will be fixed, how the ready Reconor is referred and what is the importance of suit valuation

LEARNING OUTCOME:

Students will be able to communicate effectively regarding civil procedure issues orally (in class) and in writing (on the final exam and any possible short-report assignment). Students will understand the value and use of non-adversary alternative dispute resolution procedures and their integration with and use in resolving disputes concerning procedural rules, discovery, etc. Students will increase their ability and desire to engage in lifelong learning and service in their application, practice and use of the rules of civil procedure.

UNIT I

Significant Terms and Definitions: Definitions: Decree, Judgment, Order, Foreign Court, Foreign Judgment, Mesne, Profits, Affidavit, Suit, Plaintiff, Written Statement, Suit of civil nature ;Important Concepts: Res Sub- Judice, Res judicata, Restitution

UNIT II

SOLS 403A	LABOUR and INDUSTRIAL LAW - II	L	T	P	C
		3	1	0	4

OVERVIEW:

Law comes into existence to cater to the growing needs of society, which may be caused by technological, economic, political, social changes. Law is a dynamic concept. Law is like a citadel which requires regular repairs, revamping and replacement. "Life and Laws have moved together in history and it must do in future". It is in this perspective that the Labour Legislations have to be studied.

Society evolves institutions to abhor vacuum created by changes. Industrial Revolution is a epoch-making event, which completely changes the lifestyles of society from agricultural and pastoral to industrial and materialistic one. The industrial society brought about, in its wake, excessive exploitation of the working classes by the employer who took advantage of the individual dispensability of the worker and wanted maximum profit on his investment. The golden rule of capitalism that "Risk and Right" go together provided them with prerogatives to "hire and fire". The other legal concepts which were then Introduction to Labour Legislation available were those of Master and Servant and carrot and stick etc. The principle of common law was in operation. The law of contract used to govern the relation between worker and the employer in which individual contact was struck, the terms of contract were usually verbal and mostly used in cases of breaches, leading to prosecution and imprisonment of workers. Labour and Migration Act was another legislation which gave rise to the "Indentured labour system". Anti-Combination legislations were in vague treating 'combination' of workers as act of criminal conspiracy. Longer hours of work, abysmally low wages, no safety and welfare provisions, and no insurance - the exploitation at large. State was adopting the policy of Laissez-faire (let not interfere) and employers abused workers, taking advantage of the situation.

Every society on it's onwards march revises, reviews, refurbishes and reinvents its legal concept and civilized ways of living. The changes brought about by the industrial revolution created some gaps and it became the responsibility of the society to fill-up those gaps. Society went for certain social devices to take care of the gaps, which are known as labour legislation. The labour legislations are the products of Industrial Revolution and they have come into being to take care of the aberrations created by it. They are different from common legislations, because they come to alleviate special disorders created by specific circumstances. Therefore, they are specific and not general in orientation, philosophy and concept.

The students will have plenty of options who will in future choose to expert in the field of labour law and labour management. The course aims at providing skill and knowledge to the students in the domain so that the student can in future fulfill the demands of society as well as industries.

The course is focused at nurturing labour law experts in such a way that they are academically sound to take the challenges in practical field.

SOLS 504A	LAW, POVERTY and DEVELOPMENT	L	T	P	C
		3	1	0	4

Overview

The State of India's poor does not feature much in Indian law Curricula. Only a few law schools offer an optional course. The Constitution of India - especially Article 39-A since 1976 commands innovation of legal system in such ways that no one, especially because of economic condition, is denied access to the law and its benefits. In so far as legal education is a state-funded or sponsored action and even otherwise, this Directive Principle must apply to renovation of legal education. The constitutional programme of social justice displays a dramatic concern for the "weaker sections of society". Steadily, legislation protecting their entitlements has grown to impressive proportion in the last forty years. They would be advocates, counsellors, judges, teachers; scientists in law ought to have a complete grounding in these legal processes of "development". The burgeoning "poverty law" involves: (a) constitutional provisions' (b) legislation; (c) administrative anti-poverty programmes aimed at improving economic condition f the poor; (d) legal services programmes; (e) adjudication on the entitlement of the poor through social action litigation. All these need careful study in this compulsory course.

Course Objective and Expected Outcome: The objective of this paper is to provide an understanding of basic concepts of poverty and development and their relationship with law.

UNIT I

Understanding Poverty and Development : Poverty: Meaning and Concept, Relative Dimensions, Measurement and Determinants, Issues related to Poverty in India; Development: Perspectives, Developmental index.
