6.Evaluation Process:

The evaluation of the End Term Examination is carried out centrally. Faculty members are required to evaluate the answer sheets at the central evaluation center within the designated time frame. Upon completion of the assessment, the evaluators input the marks from the assessed answer sheets into the ERP system. Following this, the marks are rechecked and verified before being finalized by the evaluators. The evaluators then generate a printed marks award list (foil report), which is submitted along with the answer sheets to the assessment center. The Examination Cell receives the marks via ERP for result compilation, while the answer sheets are retained for archival purposes.

10. Automation Status:

Automation is the process related to student registration, course management, examination administration, and result declaration without requiring manual intervention.

During the year 2019-20 Examination Department put forward a remarkable step towards automation and digitalization. All the exams during the even semester were conducted through on line mode.

- **Re-appear Registration**

In case a student needs to reappear for a particular exam or course due to failure, they can register for re-appearing through the ERP system. This process involves selecting the failed course or exam, paying any necessary fees.

- **Admit Card**

Once students have registered for courses or examinations, the ERP system generates admit cards containing essential details such as exam schedule, venue, student information, etc. These admit cards are then distributed to students either digitally or in print form. The ERP ensures accuracy in the information provided on the admit cards and facilitates easy distribution to all registered students.

- **Marks Entry**

After examinations are conducted, faculty members or designated staff enter the marks obtained by students for each exam or assignment into the ERP system. This process ensures that student performance data is accurately recorded and stored centrally for further processing.

- **Result Declaration**

Once all marks have been entered and verified, the ERP system calculates and generates results for each student based on their performance in exams, assignments, and other assessments. These results are then declared through the ERP system, making them accessible to students.

- **Grade Sheet**

After results are declared, the ERP system generates grade sheets for each student, detailing their performance in each course or subject. These grade sheets typically include information such as course name, credits, grade obtained, SGPA, CGPA etc. providing students with a comprehensive record of their academic performance.

Overall, the integration of these features into an ERP system streamlines various administrative processes, enhancing efficiency, accuracy, and transparency in student management and academic operations.
