Filmography Festival-2020

Capturing Environment through Lens

Friday, 31st January 2020

ABOUT THE FILMOGRAPHY FESTIVAL-2020

“Earth provides enough to satisfy every man's needs, but not every man's greed.” — Mahatma Gandhi

Increase in human population and thriftless use of natural resources has led to environment crisis. From a growth centred society, we need to be in consonance with nature. With this objective, School of Journalism and Mass Communication is organising 'Filmography Festival-2020 on 'Capturing Environment through Lens'. Film is a democratic platform which can be used by students to sensitise the audience about environmental concerns. As audio-visual media is an efficient tool to communicate, film festival may be used by amateur film makers to raise their voice to support nature. Students' talent of communicating their ideas may be spotlighted and recognised through festival.
